## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art reference is Casreact Abstract 99:195034 (See Reference U). One of the primary differences between the prior art process and the instantly claimed process is the halogen at the 3 position of the disubstituted pyridine product. In the instant process, the halogen is chlorine at the 3 position. In the prior art process, the halogen at the 3 position of the product is bromine.

The prior art reference does not teach nor suggest to one of ordinary skill in the art how to modify the prior art process to derive the instant process. Therefore, the claims are allowable therefrom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
